- Stephanie Raker, Project Manager Assoc
- Cyndee Olsen, Payroll Administrator
- $\boxtimes$  Jemery Pope, Chief of Administrative Service

#### Also Attending:

Sageview (Lisa Drake & Justin Bogart)

Empower (Diane Morton, & Aaron Schluep)

| Item 1: | <ul> <li>Call to Order</li> <li>A publicly noticed meeting of the Committee for Citizens' 401(a), 401(k) and 457(b) retirement plans (collectively, the "Plan"), was held on May 14, 2024. The meeting convened at 2:01 pm EST in Jacksonville, Florida via teleconference. Six members were in attendance via telephone and a quorum was established. One position (VP of Human Resources) was vacant at the time of the meeting.</li> </ul>   |
|---------|---|
| Item 2: | <ul> <li><u>Review O4. February 14. 2024 Minutes</u></li> <li>Mr. Woodward moved to approve the Q4 minutes &amp; Ms. Yang second this motion. All members present voted, and the motion was adopted 6-0.</li> </ul>   |
| Item 3: | <ul> <li>Investment Fund/Market Review – Sageview</li> <li>Mr. Bogart reviewed a positive Q1 market performance. The S&amp;P 500 outperformed the NASDAQ by 1.3%. The market rally broadened compared to 2023 beyond just tech stocks. Conventional view is that inflation and public debt remain as risks to the economy, and now may be a good time to diversify into international stocks and move from money market funds into bonds.</li> <li>Ms. Drake reviewed Q1 plan performance metrics. Our plans are outperforming the Custom Benchmark and the Category Average Benchmark this quarter and over the past year.</li> <li>60% of plan assets are currently invested in Target Date funds, still very diversified. Majority of our assets are in the American Funds 2030 and 2035. 23% of plan assets are invested in stock funds.</li> <li>T. Rowe Price New Horizons I, Mid-cap Growth, is on the watch list. Sageview uses Morningstar to public benchmark it. Sageview will monitor and make recommendations if it continues to underperform.</li> <li>Ms. Drake shared that Sageview has leveraged their client's assets in American Funds performs well and has below-average fees for "actively managed" target date funds, but the fees are higher than those offered by passive target date funds (such as Vanguard). With the CIT, the fees to participants would go down approximately 28 basis points for each of the target dates. At current levels, this would save participants approximately \$86,000 in fees annually. As Sageview brings more client assets into the CIT, the discounts to Citizens participants will</li> </ul> |

- increase. Sageview would charge a 2 basis points fee and a contract amendment would be required. Ms. Rojas requested Ms. Drake to forward over any documented information and amendments to be reviewed at the next meeting.
- Mr. Bogard summarized the materials provided in the meeting packet comparing American Funds to other the Target Date Fund options (Comparison overview including the asset class coverage, glide path, performance, standard deviation, and the net expense ratio) for our annual due diligence. The analysis showed our Target Date Funds are performing well and are still good investment options for Citizens participants.

| Item 4: | <ul> <li>O4 Plan Administrator Update</li> <li>Mr. Schluep provided a positive Q1 update on the administration of the plans. We have \$219M in assets, which is a large increase over last year. There is a healthy allocation of funds. The average account balance has increased over \$10k in a year. The Lifetime income score and participation rate remain stable.</li> <li>Empower has 93% of participants' email addresses, which allows the participants to receive specific, targeted communications based on their individual circumstances.</li> <li>The average funds utilized is low, which means participants are using a single target date fund.</li> <li>Mr. Schluep stated he would like to see the Do-it-yourself strategy decrease as studies have shown these participants do not receive the full income replacement at retirement.</li> </ul> |
|---------|---|
| Item 5: | <ul> <li>2023 True up Completion</li> <li>Ms. Rojas stated the 2023 Matching True-up was completed on 3/28/24 and applied to the applicable 401a accounts.</li> <li>Clarification was provided on the reason a participant would be eligible for the true-up. Illustrations are to be provided to Ms. Montera.</li> </ul>   |
|         |   |
| Item 5: | <ul> <li>Consideration of plan document amendments</li> <li>Mr. Taylor shared several plan amendment recommendations around eligibility, distributions and loans.</li> <li>Mr. Riley stated his view that many of these issues seemed outside of the responsibility of the retirement committee to decide or vote on. Although the committee members had no objections to any of the recommendations, it was agreed upon that no formal vote to approve would be taken at this time.</li> </ul>   |
| Item 6: | <ul> <li>SECURE 2.0 Provision</li> <li>Mr. Taylor summarized the optional provision 306 that allows deferral elections in the 457b plan at any time prior to the date that the compensation is deferred.</li> <li>Ms. Norfleet made a motion to approve provision 306 and Mr. Woodward seconded the motion. All committee members voted Yes.</li> </ul>   |
| Item 7: | Public Comments<br>Ms. Montero asked if anyone wished to make a public comment. No requests were made.  |
|         | Adjournment<br>Ms. Montero made a motion to adjourn the meeting and Mr. Woodward seconded the motion.<br>Meeting adjourned at 3:40 PM EST   |

Approved:

Amy Rojas, Committee Secretary

### **PLAN PERFORMANCE INSIGHTS**

As of 6/30/2024

767765-01

# **Citizens Property Insurance Corporation Retirement Plan**

FOR FINANCIAL PROFESSIONAL AND PLAN SPONSOR USE ONLY. ©2024 EMPOWER, LLC. ALL RIGHTS RESERVED.

### Introduction

This Plan Performance Insights report provides directional insights into your plan by presenting key measures of plan health along with overviews of participant activity. The below are important background details to understand as you review this report.

### How we capture data

Every month a comprehensive month-end "snapshot" of your plan's data is taken. The snapshot is a point-in-time capture of what is on the recordkeeping systems at the time that it is taken. Each month-end snapshot is then saved and stored so that it can be used to report on your plan's activity and performance over time.

These snapshots do not change after they are taken. Therefore, they may not reconcile with other reporting that accounts for adjustments or corrections applied after the snapshot was taken.

### Data quality is key

° T

Good data drives good analytics. Several topics and metrics in this report rely on participant data that is provided by the plan sponsor or those who work on behalf of the plan. Providing and maintaining high quality data for your entire participant population ensures the accuracy of the insights presented.

When the required data for a topic is completely unavailable, the topic will be excluded from this report.

### Benchmarking

You'll find benchmarking insights throughout this report. Benchmarks show how your plan compares to a peer group of other similar retirement plans that are on the same recordkeeping platform. The peer group used is based on your retirement plan's type and assets. The "Benchmark" represents the median (50<sup>th</sup> percentile) of the results that each plan in the peer group had for the metric that is being benchmarked. The "Top 10%" represents the 90<sup>th</sup> percentile for the same peer group.

Your peer group is comprised of **180** 401(a) plans with assets in the \$50M - \$500M range.

### **Executive summary**

FOR FINANCIAL PROFESSIONAL AND PLAN SPONSOR USE ONLY. ©2024 EMPOWER, LLC. ALL RIGHTS RESERVED.

### As of 6/30/2024

#### **Overview**

The assets and participant counts presented are effective as of period end. The assets do not reflect any adjustments, dividends, corrections, or similar that are processed after period end.

### **Executive summary**

### As of 6/30/2024

### Lifetime Income Score

#### The below is based on a standard income replacement goal of 75%

### As of 6/30/2024

5

A participant's estimated retirement income is based on 5 sources of potential income. This breakdown shows the percentage of total income by source for the plan.

| Source                 |     |
|------------------------|-----|
| Current balance        | 12% |
| Future savings         | 0%  |
| Employer contributions | 8%  |
| Social security        | 37% |
| Other assets           | 43% |

#### **Overview**

This Lifetime Income Score summary is based on all actively employed and eligible individuals for which both a date of birth and a salary have been provided. A standard salary replacement goal is used for all the included individuals.

### Percent reaching goal

The below is based on a standard income replacement goal of 75%

#### Participants reaching goal

**37** out of the **600** eligible participants that have a calculated Lifetime Income Score are projected to receive an estimated retirement income that is greater than or equal to 75% of their current salary

#### Percent reaching goal over time

FOR FINANCIAL PROFESSIONAL AND PLAN SPONSOR USE ONLY. ©2024 EMPOWER, LLC. ALL RIGHTS RESERVED.

#### As of 6/30/2024

#### **Overview**

This percent reaching goal summary is based on all actively employed and eligible individuals for which both a date of birth and salary have been provided. A standard salary replacement goal is used for all the included individuals.

### **Cash flow**

#### Year-to-date participant activity summary<sup>1</sup>

#### Impact on balances

### 9/1/2022 - 6/30/2023 7/1/2023 - 6/30/2024 \$83,498,450 \$9,405,880 -\$5,467,280 -\$9,903 -\$979,839 \$783,257 \$0 \$11,759,574 \$98,990,139

| Ending Balance     | \$83,498,450 |
|--------------------|--------------|
| Change in value    | \$5,220,213  |
| Other <sup>3</sup> | \$74,783,233 |
| Loan payments      | \$575,090    |
| Loans issued       | -\$755,039   |
| Fees <sup>2</sup>  | -\$530       |
| Disbursements      | -\$3,248,366 |
| Contributions      | \$6,923,851  |
| Beginning balance  | \$0          |
|                    |              |

### As of 6/30/2024

#### **Overview**

Cash flow illustrates the inflows and outflows of dollars from participant accounts along with the impact that those flows have on participant balances. All actively employed and separated from service participants are included.

<sup>1</sup>The year-to-date period begins when the plan is loaded onto the recordkeeping system. Therefore, the year-to-date period may not include all months for plans that were recently added.

<sup>2</sup>Fees may include but are not limited to: transactional and plan administrative fees.

<sup>3</sup>Other includes 'Transfer In', 'Transfer Out', 'Adjustments'

## **Contribution activity**

#### Total contributions at-a-glance<sup>1</sup>

|                                       | Employer    | Ot    |
|---------------------------------------|-------------|-------|
| Year to date total contributions      | \$4,657,120 | \$74  |
| Rolling 12 months total contributions | \$9,049,736 | \$356 |
|                                       |             |       |

#### As of 6/30/2024

#### **Overview**

The contribution activity details show the total of all contributions into participant accounts, excluding loan payments. Participant payroll contributions are categorized by their money type. Any employer contributions and any nonpayroll contributions are separated into their own categories. Non-payroll contributions include rollovers, transfers, and other miscellaneous contributions and are reflected as Other contributions.

<sup>1</sup>The year-to-date and rolling 12 month periods begin when the plan is loaded onto the recordkeeping system. Therefore, the periods may be less than indicated for plans that were recently added.

## **Contribution activity**

#### Below is the breakdown of the total contribution amounts and the number of participants that had a contribution within each month

|                   |                   | Employer    | Other     | Total <sup>1</sup> |
|-------------------|-------------------|-------------|-----------|--------------------|
|                   | Amount            | \$673,305   | \$22,654  | \$695,958          |

### As of 6/30/2024

#### **Overview**

The investment strategy utilization is based on all participants that have a balance greater than \$0. Each participant is assigned a single investment strategy to provide insights on how investment options, features, and services are being utilized.

When a participant is assigned a strategy, 100% of their balance is grouped within that strategy even if they have a diverse investment mix. Additionally, each participants' strategy is reevaluated and assigned every month so a participant may move in and out of the different strategies from month to month.

For the full list of investment strategies and their definitions, please refer to the glossary.

# Introduction

This Plan Performance Insights report provides directional insights into your plan by presenting key measures of plan health along with overviews of participant activity. The below are important background details to understand as you review this report.

## How we capture data

Every month a comprehensive month-end "snapshot" of your plan's data is taken. The snapshot is a point-in-time capture of what is on the recordkeeping systems at the time that it is taken. Each month-end snapshot is then saved and stored so that it can be used to report on your plan's activity and performance over time.

These snapshots do not change after they are taken. Therefore, they may not reconcile with other reporting that accounts for adjustments or corrections applied after the snapshot was taken.

# Data quality is key

° T

Good data drives good analytics. Several topics and metrics in this report rely on participant data that is provided by the plan sponsor or those who work on behalf of the plan. Providing and maintaining high quality data for your entire participant population ensures the accuracy of the insights presented.

When the required data for a topic is completely unavailable, the topic will be excluded from this report.

# Benchmarking

You'll find benchmarking insights throughout this report. Benchmarks show how your plan compares to a peer group of other similar retirement plans that are on the same recordkeeping platform. The peer group used is based on your retirement plan's type and assets. The "Benchmark" represents the median (50<sup>th</sup> percentile) of the results that each plan in the peer group had for the metric that is being benchmarked. The "Top 10%" represents the 90<sup>th</sup> percentile for the same peer group.

Your peer group is comprised of **145** 457 plans with assets in the \$50M - \$500M range.

# **Executive summary**

# Lifetime Income Score

### The below is based on a standard income replacement goal of 75%

FOR FINANCIAL PROFESSIONAL AND PLAN SPONSOR USE ONLY. ©2024 EMPOWER, LLC. ALL RIGHTS RESERVED.

## As of 6/30/2024

5

A participant's estimated retirement income is based on 5 sources of potential income. This breakdown shows the percentage of total income by source for the plan.

| Source                 |            |
|------------------------|------------|
| Current balance        | 11%        |
| Future savings         | 13%        |
| Employer contributions | <b>7</b> % |
| Social security        | 35%        |
| Other assets           | 34%        |

#### **Overview**

This Lifetime Income Score summary is based on all actively employed and eligible individuals for which both a date of birth and a salary have been provided. A standard salary replacement goal is used for all the included individuals.

# Percent reaching goal

The below is based on a standard income replacement goal of 75%

### Participants reaching goal

88 out of the 600 eligible participants that have a calculated Lifetime Income Score are projected to receive an estimated retirement income that is greater than or equal to 75% of their current salary

### Percent reaching goal over time

| Ending Balance     | \$104,023,360 |

## As of 6/30/2024

### **Overview**

Cash flow illustrates the inflows and outflows of dollars from participant accounts along with the impact that those flows have on participant balances. All actively employed and separated from service participants are included.

<sup>1</sup>The year-to-date period begins when the plan is loaded onto the recordkeeping system. Therefore, the year-to-date period may not include all months for plans that were recently added.

<sup>2</sup>Fees may include but are not limited to: transactional and plan administrative fees.

<sup>3</sup>Other includes 'Transfer In', 'Transfer Out', 'Adjustments'

# **Participation rate**

### **Participation rate comparison**

**112** eligible participants are not participating

## As of 6/30/2024

#### **Overview of those who are not participating**

64 have never participated and are without a balance

**4** have never participated but have a balance

**44** have participated previously but are not currently participating in this plan

#### **Overview**

The participation rate represents the ratio of participants that are actively participating in the plan compared to the total population of actively employed participants that are eligible to contribute. Actively participating is defined as having a regular deferral election on the recordkeeping system that is greater than 0%/\$0.

# **Contribution rate**

# As of 6/30/2024

20.3% (258) of participants are contributing over 10%. This compares to the benchmark which is **12.8%** and the top 10% which is **27.9%**.

### **Overview**

The contribution rates presented are based on all actively employed and eligible participants that have a regular deferral election on the recordkeeping system that is greater than 0%/\$0.

Percentage deferral elections are always included. Flat dollar deferral elections are included when a salary has been provided as a participant's salary is used to convert their flat dollar deferral election to a percentage election.

# Money type utilization

<sup>1</sup>The average/median contribution rates by source for these participants are: **Before-tax-** 6.8% / 7.0% **Roth-** 4.7% / 4.0%

|                                       | Participant<br>before-tax | Participant<br>Roth |
|---------------------------------------|---------------------------|---------------------|
| Year to date total contributions      | \$5,552,040               | \$554,662           |
| Rolling 12 months total contributions | \$10,761,967              | \$1,044,177         |

### Total contribution amounts by month

## As of 6/30/2024

### **Overview**

The contribution activity details show the total of all contributions into participant accounts, excluding loan payments. Participant payroll contributions are categorized by their money type. Any employer contributions and any nonpayroll contributions are separated into their own categories. Non-payroll contributions include rollovers, transfers, and other miscellaneous contributions and are reflected as Other contributions.

<sup>1</sup>The year-to-date and rolling 12 month periods begin when the plan is loaded onto the recordkeeping system. Therefore, the periods may be less than indicated for plans that were recently added.

## As of 6/30/2024

### **Overview**

The investment strategy utilization is based on all participants that have a balance greater than \$0. Each participant is assigned a single investment strategy to provide insights on how investment options, features, and services are being utilized.

When a participant is assigned a strategy, 100% of their balance is grouped within that strategy even if they have a diverse investment mix. Additionally, each participants' strategy is reevaluated and assigned every month so a participant may move in and out of the different strategies from month to month.

For the full list of investment strategies and their definitions, please refer to the glossary.

#### **Overview**

Each shape on the graph represents participants of a certain age that are at a certain level of total equity exposure from all of their funds. The size of the shape indicates the number of participants.

The black line displays the equity exposure, by age, for a representative target date glide path. The glide path was derived in conjunction with Morningstar Investment Management LLC and is for illustrative purposes only.

ed from service plan participants with a balance. Each participant is assigned to a single ent strategy against the participant's fund balances and their use of investment services and vestment strategy that ends up being assigned is the first one that has its criteria met.

strategy is as follows:

- an available managed account service.
- ble online advice service.
- nt enrolled in a model portfolio.
- self-directed brokerage account for any portion of their balance.
- ter than 95% of their balance invested in one or two target-date funds. 5% of their remaining

er than 95% of their balance invested in one or two risk-based funds. 5% of their remaining

not classified under any of the above investment strategies.

ed total balances that are assigned to the Target-date strategy or the Risk-based strategy will not r the funds within the Target-date or Risk-based asset classes. This is because all fund reporting cipant's assigned investment strategy.

ount of their balance (across all investment options) that is exposed to equities, compared to quities for each individual investment option is calculated by multiplying the participant's balance ings that are in equity asset classes. The underlying asset allocation of each investment option is option's asset allocated to equities.

### Introduction

This Plan Performance Insights report provides directional insights into your plan by presenting key measures of plan health along with overviews of participant activity. The below are important background details to understand as you review this report.

#### How we capture data

Every month a comprehensive month-end "snapshot" of your plan's data is taken. The snapshot is a point-in-time capture of what is on the recordkeeping systems at the time that it is taken. Each month-end snapshot is then saved and stored so that it can be used to report on your plan's activity and performance over time.

These snapshots do not change after they are taken. Therefore, they may not reconcile with other reporting that accounts for adjustments or corrections applied after the snapshot was taken.

#### Data quality is key

Good data drives good analytics. Several topics and metrics in this report rely on participant data that is provided by the plan sponsor or those who work on behalf of the plan. Providing and maintaining high quality data for your entire participant population ensures the accuracy of the insights presented.

When the required data for a topic is completely unavailable, the topic will be excluded from this report.

#### Benchmarking

You'll find benchmarking insights throughout this report. Benchmarks show how your plan compares to a peer group of other similar retirement plans that are on the same recordkeeping platform. The peer group used is based on your retirement plan's type and assets. The "Benchmark" represents the median (50<sup>th</sup> percentile) of the results that each plan in the peer group had for the metric that is being benchmarked. The "Top 10%" represents the 90<sup>th</sup> percentile for the same peer group.

Your peer group is comprised of **920** 401(a) plans with assets in the <\$5M range.

### **Executive summary**

FOR FINANCIAL PROFESSIONAL AND PLAN SPONSOR USE ONLY. ©2024 EMPOWER, LLC. ALL RIGHTS RESERVED.

#### As of 6/30/2024

#### **Overview**

The assets and participant counts presented are effective as of period end. The assets do not reflect any adjustments, dividends, corrections, or similar that are processed after period end.

### **Executive summary**

#### As of 6/30/2024

### Lifetime Income Score

#### The below is based on a standard income replacement goal of 75%

#### As of 6/30/2024

| Source                 |             |
|------------------------|-------------|
| Current balance        | 31%         |
| Future savings         | 0%          |
| Employer contributions | 23%         |
| Social security        | <b>46</b> % |
| Other assets           | 0%          |

#### **Overview**

This Lifetime Income Score summary is based on all actively employed and eligible individuals for which both a date of birth and a salary have been provided. A standard salary replacement goal is used for all the included individuals.

### Percent reaching goal

The below is based on a standard income replacement goal of 75%

#### Participants reaching goal

1 out of the 6 eligible participants that have a calculated Lifetime Income Score are projected to receive an estimated retirement income that is greater than or equal to 75% of their current salary

#### Percent reaching goal over time

#### As of 6/30/2024

#### **Overview**

The investment strategy utilization is based on all participants that have a balance greater than \$0. Each participant is assigned a single investment strategy to provide insights on how investment options, features, and services are being utilized.

When a participant is assigned a strategy, 100% of their balance is grouped within that strategy even if they have a diverse investment mix. Additionally, each participants' strategy is reevaluated and assigned every month so a participant may move in and out of the different strategies from month to month.

For the full list of investment strategies and their definitions, please refer to the glossary.

# Do-it-yourself (DIY) participants with high equity exposure

### Pre-retirees and retirees that are age 50 or over

Do-it-yourself participants may be over-exposing themselves to equities which can make them vulnerable during market downturns or times of general volatility. This risk is particularly harmful to those nearest retirement. As of 6/30/2024

### Do-it-yourself (DIY) participants with low equity exposure

Do-it-yourself participants may be too removed from the market. While having too much exposure to equities can be detrimental to participant outcomes, the inverse can also be true. Participants under-exposed to equities can miss out on potential investment returns that can bolster their account balance growth.

As of 6/30/2024

## THE POLITICAL NEUTRALITY OF MARKETS

Elections will take place in close to 80 countries in 2024, accounting for half the world's population, 59% of global GDP, and 75% of the global equity market<sup>1</sup>. Over the long term, equity and bond market performance tend to be influenced more significantly by economic fundamentals such as inflation, interest rates, and GDP growth than by elections. Studies generally indicate that any equity market impact related to political changes in the White House or Congress is statistically insignificant and short-lived.

#### Politics and Stock Performance (Average annual S&P 500 returns, 1930 2022)<sup>1</sup>

Interesting, but statistically insignificant

Growth of \$1,000 (dividends reinvested) since 1926<sup>2</sup>

### **ELECTION JITTERS – PREPARING FOR MARKET VOLATILITY**

Economic factors drive the stock market far more than elections, yet election years often see heightened stock volatility, especially as voting day nears. Increased volatility stems from uncertainty, with some investors opting to reduce risk before elections and reinvesting once policy clarity emerges.

#### Stock volatility during election & non-election years<sup>2</sup>

## Q2 2024 BY THE NUMBERS

#### **Case for Easing**

Both June's cooler-than-expected CPI (3.0% YOY) and May's PCE (2.6% YOY) readings show the Fed continues to make incremental progress toward its 2% inflation target. The unemployment rate rose to 4% from a recent low of 3.4%. Cooling manufacturing activity, slowing retail sales, and rising auto and credit card delinquencies indicate a slowdown. Markets now project the first rate cut to be in September.

| E (2.6% YOY)     | 7.9%                                    | 19  | 0.1%                                    |

#### Nvidia and the AI Arms Race

The Q2 equity rally was driven by advancements in the AI race, which has been powered by Nvidia and its advanced graphics processing units (GPUs). Nvidia's market cap surged from \$1 trillion to over \$3 trillion in less than a year, becoming the world's second largest company behind Microsoft. Microsoft's dominance in generative AI was solidified with OpenAI's ChatGPT 4 multimodal language model release. Apple's announcement to integrate generative AI into its products was also well received by investors.

#### Longest Drawdown for Bonds

Inflation and the resulting Fed rate hikes have severely impacted fixed income instruments. The US Bloomberg Agg Index is experiencing its longest drawdown in history at over 940 days, far surpassing the previous 361-day record set in 2000. As of early May, the index was down more than 12% from its previous high. Meanwhile, the correlation between stocks and bonds reached its highest level ever, reducing bonds' effectiveness as a hedge against stock volatility.

#### Positive

#### Neutral

#### Negative

MANUFACTURING

The ISM Manufacturing PMI registered a meek 48.5% in

June and 48.6% in April. The index has been below 50, or

contractionary levels, in 19 out of the last 20 months.

#### EMPLOYMENT

Though still positive, job growth slowed in the second quarter. Nonfarm payrolls increased 206,000 in June, yet both April and May's increases were revised downward. The unemployment rate inched up to 4.1%.

**GDP GROWTH** 

The U.S. economy increased at an annual rate of 1.4% in

Q1, a slowdown from the 3.4% delivered in Q4. The

decrease was largely attributable to a decrease in

inventories, a volatile component.

#### HOUSING

Existing home sales fell in May (0.7%) and April (1.9%) while the median sales price reach a record high of \$419,300. New home sales fell in both May (11.3%) and April (4.7%), signaling that the housing market is losing momentum.

INFLATION

June's CPI reading of 3.0% YoY helped the case for rate cuts

later in the year. Shelter and auto-insurance components, the

stickiest of all components, remain elevated.

#### GLOBAL TRADE

Container shipping rates have tripled since last June due to ongoing conflicts around the Red Sea, disrupting voyage times and complicating shipping logistics globally.

#### CORPORATE EARNINGS

The Q1 earnings growth rate for the S&P 500 was 4.6%, well ahead of analyst expectations. The Mag-7 names accounted for most of the growth, whose aggregate earnings growth rate was 51.7%.

#### CONSUMER SPENDING

The pace of consumer spending cooled in the second quarter, with PCE readings in both April (0.1%) and May (0.2%) slowing meaningfully. Spending patterns of lower income households indicate a slowdown.

#### FISCAL SPENDING

The current federal deficit stands at \$1.9 trillion, with aggregate government debt projected to hit a record 106% of GDP by 2028. Annual debt servicing costs have exceeded defense spending.

#### INTEREST RATES

Rates increased slightly across the yield curve in Q2 as the U.S. economy has delivered better-than-anticipated economic growth. Additionally, Fed Chair Powell indicated that the Fed would take its time in cutting rates.

#### **Calendar of Economic Data Releases**

| July                                | August                      |        | September                  |        |
|-------------------------------------|-----------------------------|--------|----------------------------|--------|
| Consumer Price Index (June) July 11 | Nonfarm Payrolls (July)     | Aug 2  | Nonfarm Payrolls (Aug)     | Sep 6  |
| Q2 Gross Domestic Product July 25   | Consumer Price Index (July) | Aug 14 | Consumer Price Index (Aug) | Sep 11 |
| FOMC Rate Decision July 31          |                             |        | FOMC Rate Decision         | Sep 18 |

### **EQUITIES**

A broad equity rally in Q1 gave way to a more concentrated surge in Q2, driven primarily by the Technology and Communication Services sectors. These sectors capitalized on strong earnings, substantial share buybacks, and increased investment in Al. Meanwhile, mid- and small-cap equities lagged, reflecting investor preference for quality amid economic uncertainty and the challenges faced by businesses relying on bank financing amidst sustained higher rates. Internationally, Al-related hardware and infrastructure companies were a tailwind for emerging market equities.

Returns pertain to Morningstar categories. Valuations pertain to the Russell style indices.

### **EXTENDED VALUATIONS**

Heightened valuations among select large growth names has brought about popular headlines drawing parallels to the late 1990s. The Magnificent Seven (Mag 7), a term often used to describe the leading tech companies of today (Apple, Microsoft, Amazon, Google, Facebook, Nvidia, Tesla), differ significantly from the names of the dot-com bubble era. Unlike the speculative frenzy of the late 1990s, today's Mag 7 firms have diversified revenue streams beyond just advertising or early-stage growth. Today's top 10 names account for 26.8% of the total S&P 500 earnings growth, substantially higher than the 17.1% in late 1999, prior to dot-com crash. Despite that, today's market cap concentration of the S&P 500 is at all time highs.

#### Weight of the top 10 stocks in the S&P 500

% of market capitalization of the S&P 500

#### **Earnings contribution of the top 10 in the S&P 500** Based on last 12 months' earnings

### **FIXED INCOME**

The longest drawdown in fixed income history carries on as rates rose slightly during the second quarter. The end of June marked the 8<sup>th</sup> worst first six months in history for fixed income. Despite this, progress has been made in combatting inflation, though components like shelter are proving to be stickier than anticipated. Anticipated rate cuts later in the year should bode well for fixed income investors. Outside of the U.S., emerging market debt remains a bright spot due to economic growth, rate cuts, and improved reform.

|---|--|---|---|----------------------|
| T. Rowe Price New Horizons I<br>1.55<br><i>Mid-Cap Growth</i> | 03/31/2024   | -   | 3rd Quartile Score- The funds 2021 performance was in the 73rd<br>percentile of peers in the Mid Cap Growth category and was in the 90th<br>percentile for 2022. Ytd., the funds is in the bottom quartile as well.<br>Although categorized against mid cap managers, this fund tends to buy<br>small caps and lets them run, leading to somewhat of a benchmarking<br>challenge. 10 yr. performance is still top decile. | Continue On<br>Watch |

|--|-----------------|--|
| PIMCO Income Instl<br>0.84<br>Multisector Bond     | 06/30/2024      | Performance Update (6/30/2024): Fixed income markets were generally positive in the second quarter, as Investors navigated a volatile rate market and sticky inflation. The PIMCO Income fund achieved a positive total return across the second quarter as well as over the trailing 12 months, trailing its peer group but outperforming its benchmark across both periods. The Fund's active US duration management was its largest contributor relative to its benchmark for both Q2 and the trailing 12 months, as managers tactically adjusted the overall duration exposure given the moves in broader rate markets. The fund's currency positioning and exposure to emerging markets were key detractors in both time periods.   |
|  |                 | Strategy Summary: Dan Ivascyn, Alfred Murata and Joshua Anderson serve as co-managers on the fund. The fund has a benchmark-agnostic strategy with flexibility to access a robust global opportunity set. It seeks to maximize income by focusing on senior securities within the capital structure of an issue and avoiding negative credit surprises. The portfolio may maintain up to half its assets in below investment grade securities while targeting an intermediate term average duration. The prospectus benchmark is the Bloomberg U.S. Aggregate Bond Index.  |
| BlackRock Equity Dividend K<br>1.93<br>Large Value | 06/30/2024      | Performance Update (6/30/2024): For the quarter, the BlackRock Equity Dividend fund outperformed<br>both the benchmark and average peer. The largest contribution to performance came from stock<br>selection in the Energy sector, specifically in the oil, gas & consumable fuels industry. Stock selection<br>within the Financials sector also proved beneficial for the quarter, most notably within banks. For the<br>trailing 12 months, the fund outperformed its benchmark yet underperformed the average peer. The<br>largest contributor to relative performance was stock selection in Financials. Within the sector, security<br>selection in the banks and financial services industries proved to be the most beneficial. Allocation<br>decisions also contributed to outperformance for the year, as the fund benefited from an underweight<br>position in a weak performing Real Estate sector. |
|  |                 | Strategy Summary: Managers at this fund search for companies with steadily growing dividends that<br>are trading at a discount. Companies must generate a healthy level of profit and cash flow to provide<br>some assurance that future dividend payments will continue. As a result, the portfolio tends to be<br>heavily invested in blue chip companies that can withstand many types of economic environments.<br>The Russell 1000 Value Index is the prospectus benchmark for this strategy.   |

| Pioneer Fundamental Growth K 06/30/2024<br>3.10<br>Large Growth |                 | <ul> <li>Performance Update (6/30/2024): The Pioneer Fundamental Growth underperformed the berduring the quarter and one year period. The portfolio was underweight NVIDIA which performe exceptionally well due to AI related demand. The underweight allocation to this stock was the sbiggest detractor to performance for the period. An addition headwind was an underweight po Apple, shares were under pressure due to market share losses in China and then rebounded in quarter on solid financial results. An individual contributor was an overweight position in Qualco outperforming the broader market driven by an announcement that they would be partnering with Microsoft to power the next generation of AI powered personal computers.</li> <li>Strategy Summary: The fund seeks long term capital growth by investing in quality stocks at at valuations that can generate attractive risk adjusted returns. The prospectus benchmark for the strategy is the Russell 1000 Growth Index.</li> </ul> |  |  |  |  |  |
| JHancock Disciplined Value Mid Cap R6<br>0.57<br>Mid-Cap Value  | 06/30/2024      | Performance Update (6/30/2024): Returns across the major U.S. equity market indices were mixed during the second quarter, with large-cap equities, specifically large Technology companies, outperforming. By contrast, mid-cap and small-cap equities ended the quarter in negative territory. Against this backdrop, the fund underperformed its benchmark and category peers. Both sector allocation and stock selection detracted from relative returns during the quarter. From a sector standpoint, an underweight to Utilities sector detracted from relative returns. Despite the quarterly underperformance, the fund did outperform its benchmark and category peers over the trailing one-year period. Moving forward managers continue to maintain a cyclical bias with overweights to more economically sensitive sectors like Industrials and Consumer Discretionary as well as underweights to the low beta bond proxy sectors like Consumer Staples, Utilities and REITs.                                |  |  |  |  |  |
|   |                 | Strategy Summary: Sub advisor Boston Partners focuses on companies with attractive relative valuations, positive momentum and sound business fundamentals to build a well diversified portfolio of mid cap value companies. The team utilizes both quantitative screens and traditional bottom up fundamental analysis. Analysts aim to identify a catalyst that will unlock a company's value, whether a new product, management change, or restructuring. Positions generally range from 0.30% 2% of the total portfolio and Managers have typically held around 150 stocks in the portfolio.  |  |  |  |  |  |

|--|-----------------|--|
| T. Rowe Price New Horizons I<br>1.55<br>Mid-Cap Growth     | 06/30/2024      | Performance Update (6/30/2024): The fund continues to struggle relative to its peers. Performance trailed both the category average and the fund's benchmark for the quarter and over the past twelve months. Industrial and Business Services struggled in the quarter. This, coupled with poor security selection in the Health Care also hurt the return. Repligen, a Life Sciences firm, was among the top detractors. Performance over the past year had similar negative issues. The fund's holdings in Technology also hurt the return. This included BILL, a business-to-business payments processor hurt the return.  |
|  |                 | Strategy Summary: Management focuses on Small Cap Companies who project at least a sustainable 15% annual earnings growth. They look for companies within the Russell 2000 Growth Index.<br>Additionally, the fund is seeking long term capital growth from rapid growing companies early in their corporate life cycle. The prospectus benchmark for the strategy is the Russell 2000 Growth Index.   |
| American Century Small Cap Value R6<br>0.60<br>Small Value | 06/30/2024      | Performance Update (6/30/2024): The American Century Small Cap Value strategy underperformed<br>its prospectus benchmark (Russell 2000 Value Index) in the second quarter, ranked in the third<br>quartile relative to peers. The underperformance of the fund can be attributed to allocations within the<br>Consumer Discretionary and Financials while allocation in Information Technology helped the funds'<br>performance. Of note, holdings stocks such as Coherent, The Brink's Company, and Axis Capital<br>Holdings performed well and in favor of the portfolio. Conversely, names such as Dave &Buster's<br>Entertainment, Brunswick, and EVERTEC were part of the fund's key detractors to performance. For the<br>trailing one-year, the fund slightly underperformed the benchmark. |
|  |                 | Strategy Summary: This is a high conviction strategy that tends to overweigh certain sectors (namely Financials) if the underlying thesis holds. PM's Jeff John and Ryan Cope run twenty five proprietary screens that incorporate quality, valuation, FCF, and normalized earnings. Those screens flow through to fundamental research, followed by the construction of a Total Quality Score that combines both relative and absolute data points. The Total Quality Score not only serves as an absolute comparable score, but dually serves as an initial sizing matrix, with the higher score receiving the higher initial weighting within the portfolio. Fund comments are relative to the Russell 2000 Value Index.  |

|--|-----------------|---|
| American Funds New Perspective R6<br>1.13<br>Global Large-Stock Growth | 06/30/2024      | Performance Update (6/30/2024): The fund outperformed its index and category peers in the second quarter, yet trailed the category benchmark (MSCI ACWI Growth). Global stocks yielded modest gains in Q2, with U.S. and emerging markets outpacing developed international stock markets. Two of the largest themes in the portfolio, Semiconductors and Pharmaceuticals, were the primary drivers of performance for the quarter. Shares of Broadcom and TSMC advanced sharply and the continued momentum in weight loss drugs benefitted both NovoNordisk and Eli Lilly. The fund trailed its index while outpacing peers for the 1-year period. U.S. mega caps have dominated global stock returns for the trailing one-year period, causing a headwind for the fund being underweight to names such as NVIDIA and Amazon. Healthcare is the most pronounced sector overweight in the fund and continues to be a primary contributor to performance.  |
|  |                 | Strategy Summary: The long established American funds investment philosophy is built around a strong research, bottom up effort combined with wide diversification in portfolio construction with the goal of achieving consistent long term performance. Another key component has always been their global perspective, backed by one of the industry's earliest efforts in international research. New Perspective is their global, GARPY growth fund product that maintains a roughly 50/50 US/ international split among primarily large cap multinational companies. The performance benchmark for the strategy is the MSCI All Country World index.  |
| ClearBridge International Growth IS<br>0.83<br>Foreign Large Growth    | 06/30/2024      | Performance Update (6/30/2024): The fund underperformed its index and foreign large growth peers<br>in the second quarter. International stocks in developed markets languished in Q2, lagging both U.S.<br>and emerging market peers. Against this backdrop, out-of-benchmark exposure to Emerging Markets,<br>namely in semiconductor contract manufacturing and design giant TSMC, was a significant<br>contribution. On the other side of the chip trade, shares of semiconductor equipment manufacturer<br>Tokyo Electron declined sharply, reflecting market enthusiasm for AI beneficiaries over software<br>names. Exposure to Accenture further weighed on results as shares of the IT services company<br>declined on weak first quarter earnings. The fund lagged its index while performing in line with the<br>category average for the 1-year period. The fund's growth tilt vs. its core benchmark, specifically being<br>underweight the Banking industry, weighed down one-year returns. |
|  |                 | Strategy Summary: Elisa Mazen, Michael Testorf, and Pawl Wroblewski purport to have a long term idea what a company is really worth. Short term disruptions allow them to buy those names opportunistically. The strategy employs a proprietary factor model to narrow down the universe and prioritize research. Each of the PMs covers sectors, wherein they develop a target price for each name. All PMs must agree before a name is added to the portfolio. Both the prospectus benchmark and fund commentary are tied to the MSCI EAFE Index.   |

|--|-----------------|---|
| American Funds 2010 Trgt Date Retire R6<br>0.00<br>Target-Date 2000-2010 | 06/30/2024      | Performance Update (6/30/2024): Continuing the trend of concentrated stock performance, U.S. large cap growth stocks gained more than 8% in Q2, while large cap value, non U.S. developed and mid and small cap stocks declined. Global bonds were flat to lower. The European Central Bank (ECB) cut interest rates for the first time in nearly five years, setting the stage for U.S. central bankers to follow suit. Amid this backdrop, the funds lagged their S&P Target Date indices over the quarter. For the longest dated vintages, a tilt towards growth stocks was offset by a lower total equity exposure. Higher weightings in mid and small caps also detracted. In the further dated vintages, where total equity is slightly higher than benchmark, a tilt towards value stocks was the main detractor. Security selection was generally negative within equities but positive within fixed income. Over the trailing 12 months, all vintages beat their respective S&P Target Date indices, due to strong security selection and bias towards US equities over international equities.<br>Strategy Summary: The glide path is defined in terms of changing objectives, rather than allocations, over time. The series aims to deliver above average equity exposure with below average levels of volatility, through the use of a proprietary suite of actively managed, low cost mutual funds. An asset allocation committee is allowed to tactically manage around the strategic objectives to the tune of +/ 10%. Relative to peers, the series has a strong domestic and large cap bias, and relies less heavily on lower quality bond instruments. |

#### **Monthly Net Asset Flows**

Investing in mutual funds is subject to risk and loss of principal. There is no assurance or certainty that any investment strategy will be successful in meeting its objectives.

Investors should consider the investment objectives, risks, charges and expenses of the funds carefully before investing. The prospectus contains this and other information about the funds. Contact your representative to obtain a prospectus, which should be read carefully before investing or sending money.

The target date of a target date fund may be a useful starting point in selecting a fund, but investors should not rely solely on the date when choosing a fund or deciding to remain invested in one. Investors should consider the fund's asset allocation over the whole life of the fund. Often, target date funds invest in other mutual funds, and fees maybe be charged by both the target date fund and the underlying mutual funds. A fund with higher costs must perform better than lower cost fund to generate the same net returns over time.

### As of 6/30/2023

### **Monthly Net Asset Flows**

Investing in mutual funds is subject to risk and loss of principal. There is no assurance or certainty that any investment strategy will be successful in meeting its objectives.

Investors should consider the investment objectives, risks, charges and expenses of the funds carefully before investing. The prospectus contains this and other information about the funds. Contact your representative to obtain a prospectus, which should be read carefully before investing or sending money.

The target date of a target date fund may be a useful starting point in selecting a fund, but investors should not rely solely on the date when choosing a fund or deciding to remain invested in one. Investors should consider the fund's asset allocation over the whole life of the fund. Often, target date funds invest in other mutual funds, and fees maybe be charged by both the target date fund and the underlying mutual funds. A fund with higher costs must perform better than lower cost fund to generate the same net returns over time.

# Section V Appendix

# **ACTIVE INVESTMENT OPTIONS ANALYSIS CRITERIA**

All active plan investment options are reviewed quarterly against their peer group and index benchmark to determine the performance and quality of each offering. Each are evaluated using the following criteria:

- 1. Trailing 1, 3, 5 and 10 year returns Total return is a basic measure of a fund's performance. Fund returns over each period are factored into a weighted average, based on the life of a fund. Recent returns receive a slightly higher weighting, while older returns, which may have been produced under different conditions, are weighted less.
- 2. Rolling period returns A rolling period return divides a longer time frame into smaller time periods. A rolling 12-month return over five years is computed by first calculating a single period return over the first twelve months. Next, it calculates the 12-month return for months 2-13. The process continues until finally reaching the 12-month period spanning months 48-60. The final rolling figure reflects the average of all of the 12-month returns.
- 3. Batting Average Batting average is calculated by (1) tallying the number of months in a given observation window where the investment return is greater than the return of the peer group median return and (2) dividing this amount by the total number of months in the observation window. The result is a ratio that ranges between 0 and 1. A batting average of greater than 0.50 signifies that the investment has outperformed the peer group more frequently than it has underperformed, irrespective of the magnitude of any outperformance or underperformance.
- 4. Style Consistency to the appropriate index We utilize R-squared to assess whether the funds selected for the plan continue to operate and perform as expected within their appropriate asset class. R-squared measures the closeness between a fund's returns and movements in the benchmark. All active funds have some deviation from their benchmark, but excessive deviation could indicate that a fund is drifting away from its stated category mandate.
- 5. Modified Sharpe Ratio The standard Sharpe Ratio calculation is calculated by subtracting the risk-free rate of return (the US Treasury Bill is typically used) from the portfolio return and dividing the result by the portfolio's standard deviation. A higher Sharpe ratio indicates that the portfolio was able to generate a higher return per unit of risk. Modified Sharpe Ratio is a related statistic that is equal to the Sharpe Ratio under normal circumstances. However, the Modified Sharpe calculation adds an exponent to the denominator that effectively raises the denominator to the -1 power in circumstances in which an investment's excess return is negative. This modification ensures that investments with both negative excess returns and higher standard deviations rank lower than investment with negative excess returns and lower standard deviations. Under the standard Sharpe Ratio calculation, the opposite is true.
- 6. Alpha The use of Alpha allows us to gauge the effectiveness of the manager. Alpha is the difference between the portfolio's actual return and its expected return given the funds level of risk as calculated by beta.
- 7. Up Capture Ratio The up capture ratio calculates the percentage of return of an index that a fund has captured during up market cycles. It tracks the fund's relative performance versus the appropriate index when the index is going up.
- 8. Down Capture Ratio The down capture ratio calculates the percentage of return of an index a fund has captured during down market cycles. Funds that perform well in this category tend to reduce the downside loss for investors during bear markets.
- 9. Expense Ratio The expense ratio is compared to the appropriate category average expense and then given a score based upon that percentage. This rewards low-cost funds and penalizes high-cost funds. Expense ratios are effectively "double weighted" in our scoring methodology, because performance returns are already net of expenses. Since fiduciaries are encouraged to carefully manage expenses, we believe explicitly factoring in fund fees is prudent.

Each fund is benchmarked to a specific market index, and fund performance is evaluated and compared to a relevant peer group using Morningstar category classifications. A fund is given a peer group ranking for each criterion, shown as a percentage. The percentage rankings for all criteria are then averaged to give a fund its average ranking score. All funds with at least a three year track record are scored in the above manner. A fund is then classified as Top Decile, top Quartile, 2nd Quartile, 3rd Quartile or 4<sup>th</sup> Quartile based upon the overall score compared to all other funds within that particular asset category.

# **PASSIVE INVESTMENT OPTIONS ANALYSIS CRITERIA**

All passive investment options are reviewed quarterly against their peer group and index benchmark to determine the performance and quality of each offering. Each are evaluated using the following criteria:

- 1. Expense Ratio The percentage of fund assets, net of reimbursements, used to pay for operating expenses and management fees, including 12b-1 fees, administrative fees, and all other asset-based costs incurred by the fund, except brokerage costs. Fund expenses are reflected in the fund's NAV. Sales charges are not included in the expense ratio. The Prospectus Net Expense Ratio is collected annually from a fund's prospectus.
- 2. Tracking Error A measure of the difference in returns between an investment and a benchmark. Tracking error is reported as a standard deviation of the difference between the returns of an investment and its benchmark.
- 3. R-Squared A statistical metric that ranges from zero to 100 and measures the percentage of portfolio's performance that is explained by the movement of its benchmark index. R-Squared is helpful in assessing the reliability of alpha and beta in explaining a portfolio risk and return characteristics. An r-squared of 100 would mean that the portfolio's performance movements are perfectly correlated with those of the benchmark over time, and would suggest that alpha and beta may be relied upon with a high degree of confidence.
- 4. Beta A measure of the volatility, or systematic risk, of an investment in comparison to a market index as a whole. Beta is calculated using regression analysis. Beta represents the tendency of an investment's returns to respond to moves in the market or index that it's calculated against. A beta of 1 indicates that the investment's price moves with the market. A beta of less than 1 means that the investment is theoretically less volatile than the market. A beta of greater than 1 indicates that the investment's price is theoretically more volatile than the market. The reliability of an investment's beta is a function of the investment's r-squared value in relation to the benchmark. A high r-squared value signifies that the beta measure is reliable, while a low r-squared signifies that it is potentially inaccurate.

Each of the criteria above caries a proprietary weight. An index fund is evaluated and ranked in each of the above criteria relative to their peer group. A fund is given a peer group ranking for each criterion. The percentage rankings for all criteria are then weighted to give a fund its average ranking score.

The raw score is then normalized on a scale of 1 to 100, with 1 being the best and 100 the worst. The top 75% of the funds in a category receive a passing score, while the bottom 25% fail.

# **GLOSSARY OF TERMS**

| TERM                        | DEFINITION   |
|-----------------------------|--|
| Alpha                       | A risk-adjusted measure of performance that is equal to the difference between a portfolio's actual return and its expected performance given its<br>level of risk as measured by beta. A positive alpha value indicates the portfolio has performed better than its beta would predict. In contrast, a<br>negative alpha indicates the portfolio has underperformed given the expectations established by beta. Alpha can also be viewed as an abnormal<br>level of return in excess of what might be predicted by an equilibrium pricing model like the Capital Asset Pricing Model (CAPM).  |
| Annualized Return           | Returns for periods longer than one year are expressed as "annualized returns." They represent an average amount of money earned by an investment each year during the specified time frame. When compounded over a certain period of time, they would produce a fund's total return.  |
| Asset Class                 | A group of investments that has similar attributes. These attributes can be defined by their level of risk or return, or how they behave in the market.<br>The three main asset classes are equities (stocks), fixed-income (bonds), and cash equivalents (money market instruments).  |
| Batting Average             | Batting average is calculated by (1) tallying the number of months in a given observation window where the investment return is greater than the return of the peer group median return and (2) dividing this amount by the total number of months in the observation window. The result is a ratio that ranges between 0 and 1. A batting average of greater than 0.50 signifies that the investment has outperformed the peer group more frequently than it has underperformed, irrespective of the magnitude of any outperformance or underperformance. A 10-year observation window is used in calculating batting average, unless the investment does not have sufficient performance history, in which case an inception-to-date figure is calculated.   |
| Beta                        | A measure of the volatility, or systematic risk, of an investment in comparison to a market index as a whole. Beta is calculated using regression analysis. Beta represents the tendency of an investment's returns to respond to moves in the market or index that it's calculated against. A beta of 1 indicates that the investment's price moves with the market. A beta of less than 1 means that the investment is theoretically less volatile than the market. A beta of greater than 1 indicates that the investment's price is theoretically more volatile than the market. The reliability of an investment's r-squared value in relation to the benchmark. A high r-squared value signifies that the beta measure is reliable, while a low r-squared signifies that it is potentially inaccurate. |
| Benchmark                   | A standard against which the performance of a security, mutual fund or investment manager can be measured. Typically, a benchmark is a broad market index that groups many securities together in some systematic way.   |
| Collective Investment Trust | A fund that is operated by a trust company or a bank and handles a pooled group of trust accounts. Collective investment funds (CITs) combine the assets of various individuals and organizations to create a larger, well-diversified portfolio. CITs are not regulated by the Investment Company Act of 1940 but are regulated by the Office of the Comptroller of the Currency ("OCC") and subject to oversight by the Internal Revenue Service ("IRS") and the Department of Labor ("DOL").  |
| Down Capture Ratio          | A ratio that measures the overall performance of a portfolio during falling markets. This measure analyzes how well a portfolio (or an investment manager) performed relative to its benchmark/index during periods when the benchmark fell. For example, a down-capture ratio of 95% (for a given period of time) means that the portfolio lost 5% less than its benchmark during the specified time period.  |
| Expense Ratio               | The percentage of fund assets used to pay for operating expenses and management fees, including 12b-1 fees, administrative fees, and all other asset-based costs incurred by the fund, except brokerage costs. Fund expenses are reflected in the fund's NAV. Sales charges are not included in the expense ratio.   |
| Growth Stock                | Investors employing a growth investment strategy buy stocks of companies with a recent history of above average increases in earnings in anticipation that earnings growth will continue. Growth stocks are often characterized by high valuation ratios (e.g., high price-to-earnings ratios).  |

# **GLOSSARY OF TERMS**

| TERM                  | DEFINITION   |
|-----------------------|--|
| Large Cap             | Companies with a market capitalization value of more than \$10 billion.  |
| Market Capitalization | Calculated by multiplying the number of a company's shares outstanding by its stock price per share.   |
| Mid Cap               | Companies with market capitalization value between \$2.5 (typically) and \$10 billion.   |
| Modified Sharpe Ratio | The standard Sharpe Ratio calculation is calculated by subtracting the risk-free rate of return (the US Treasury Bill is typically used) from the portfolio return and dividing the result by the portfolio's standard deviation. A higher Sharpe ratio indicates that the portfolio was able to generate a higher return per unit of risk. Modified Sharpe Ratio is a related statistic that is equal to the Sharpe Ratio under normal circumstances. However, the Modified Sharpe calculation adds an exponent to the denominator that effectively raises the denominator to the -1 power in circumstances in which an investment's excess return is negative. This modification ensures that investments with both negative excess returns and higher standard deviations. Under the standard Sharpe Ratio calculation, the opposite is true. |
| Morningstar Category  | A proprietary Morningstar data point that groups investment managers into categories based on the investment approach or strategy utilized by the investment manager. Categories help investors and investment professionals make comparisons between funds.   |
| Moving Average        | Measures the average price of a security over some specified period of time (e.g., 1 month, or 12 months). Then the subset of returns is modified by<br>"shifting the time period forward"; that is, excluding the first number of the series and including the next number following the original subset in the<br>series. This creates a new subset of numbers, which is averaged. This process is repeated over the entire data series or a specified time frame.   |
| Mutual Fund           | An investment company that continuously offers new equity shares in an actively managed portfolio of securities by pooling money from many investors. All owners in the fund share in the gains or losses of the fund. Shares of a mutual fund are redeemable on demand at fund's current Net Asset Value (NAV). Each mutual fund is managed to a particular objective that is stated in the fund's prospectus.  |
| Net Asset Value (NAV) | A mutual fund share's value, calculated once per day, based on the closing market price of each security in the fund's portfolio. It is calculated by deducting the fund's liabilities from the total assets and dividing this net asset amount by the number of share's outstanding.  |
| Rolling Return        | Measures the return of an investment over some specified period of time (e.g., 1 year, or 3 years) and repeats the calculation over a stated time frame. A rolling period return divides a longer time frame into smaller time periods. For example, a rolling 12-month return over 3 years starts by calculating a single period return over the first twelve months. Then, the subset of returns is modified by rolling the data forward by excluding the first number (first month in this case) and including the next number (month 13) in the data series. This process continues over a stated time frame (3 years in this example).  |
| R-Squared             | A statistical metric that measures the fraction of variation in the movement of one variable in relation to another variable. In the case of a mutual fund, R-squared measures the percentage of the mutual fund's performance that is explained by the movement of its benchmark. The metric ranges from 0 to 100. An R-squared of 100 means that all of the portfolio's performance is completely explained by the movements of a benchmark over a calculated time period. A high R-squared (between 85 and 100) indicates the fund's performance patterns have been in line with the index. A lower number would mean that the fund behaves much differently from the index.  |
| Standard Deviation    | A statistical measure of dispersion or variation from the average. A high standard deviation for an investment means the historical range of performance was wide, implying greater volatility.  |
| Total Return          | Measures the performance of an investment over a given period, including income from dividends and interest, plus any appreciation or depreciation in the market value (or price) of an investment.  |

## **GLOSSARY OF TERMS**

| TERM             | DEFINITION   |
|------------------|--|
| Tracking Error   | A measure of the difference in returns between an investment and a benchmark. Tracking error is reported as a standard deviation of the difference between the returns of an investment and its benchmark.   |
| Turnover Ratio   | Measures the percentage of a mutual fund's holdings that have been "turned over" or replaced with other holdings in a given year. This ratio includes all trading activity even if a holding wasn't fully replaced by another holding.   |
| Up Capture Ratio | A ratio that measures the overall performance of a portfolio during rising markets. This measure analyzes how well a portfolio (or an investment manager) performed relative to its benchmark/index during periods when the benchmark rose. For example, an up-capture ratio of 108% (for a given period of time) means that the portfolio gained 8% more than its benchmark during the specified time period. |
| Value Stock      | Investors employing a value investment strategy buy stocks of companies they believe are underpriced based on some fundamental valuation metrics (e.g., low price-to-earnings ratios), in anticipation that the price performance of the stock will reverse.   |

| INVESTMENT OPTION<br>CATEGORY        | BENCHMARK  | BENCHMARK/INDEX DEFINITION   |  |  |  |
|--------------------------------------|--|--|--|--|--|

| Money Market                         | 3-Month Treasury Bill  | Three-month T-bills are government-backed, short-term investments considered to be representative of a risk-free investment.   |  |  |  |
| Stable Value / Guaranteed<br>Account | 3-Month Treasury Bill  | Three-month T-bills are government-backed, short-term investments considered to be representative of a risk-free investment.   |  |  |  |
|                                      |  | BOND   |  |  |  |
| Ultrashort Bond / Short-Term<br>Bond | Bloomberg U.S. Gov't/Credit 1-3<br>Year TR                                   | Unmanaged index which is a component of the U.S. Government/Credit Bond Index, which includes Treasury and agency securities (U.S. Government Bond Index) and publicly issued U.S. corporate and foreign debentures and secured notes (U.S. Credit Bond Index). The bonds in the index are investment grade with a maturity between one and three years.   |  |  |  |
| Short Government Bond                | Bloomberg Government 1-5 Year<br>TR Index                                    | This index includes all medium and larger issues of U.S. government, investment-grade corporate, and investment-grade international dollar-denominated bonds that have maturities of between 1 and 5 years and are publicly issued.  |  |  |  |
| Intermediate Government<br>Bond      | Bloomberg U.S. Gov't/Mortgage<br>TR Index                                    | The index measures the performance of U.S. government bonds and mortgage-related securities.   |  |  |  |
| Intermediate-Term Bond               | Bloomberg U.S. Aggregate Bond<br>TR Index                                    | Represents securities that are SEC-registered, taxable and dollar denominated. The index covers the U.S. investment grade fixed rate bond market with index components for government and corporate securities, mortgage pass-through securities and asset-backed securities. All returns are market value weighted inclusive of accrued interest.   |  |  |  |
| Long Government Bond                 | Bloomberg U.S. Government Long<br>TR Index                                   | Unmanaged index that includes all publicly issued U.S. Treasury securities that have a remaining maturity of 10 or more years, are rated investment grade, and have \$250 million or more of outstanding face value/   |  |  |  |
| Long Term Bond                       | Bloomberg U.S. Long<br>Government/Credit TR Index                            | This index includes all medium and larger issues of U.S. government, investment-grade corporate, and investment-grade international dollar-denominated bonds that have maturities of greater than 10 years and are publicly issued.  |  |  |  |
| Inflation-Protected Bond             | Bloomberg U.S. Treasury Inflation<br>Protected Securities (TIPS) TR<br>Index | Consists of U.S. Treasury Inflation-Protection Securities that have at least a year left to maturity and are non-<br>convertible, rated investment grade of at least BBB by S&P or Baa3 by Moody's, fixed rate, and have more<br>than \$250 million par value outstanding.   |  |  |  |
| Corporate Bond                       | Bloomberg U.S. Credit TR Index   | This index represents publicly issued U.S. corporate and specified foreign debentures and secured notes that meet the specified maturity, liquidity, and quality requirements. To qualify, bonds must be SEC-registered. The index includes both corporate and non-corporate sectors. The corporate sectors are Industrial, Utility, and Finance, which include both U.S. and non-U.S. corporations. The non-corporate sectors are Sovereign, Supranational, Foreign Agency, and Foreign Local Government. |  |  |  |
| Multi-sector Bond                    | Bloomberg U.S. Aggregate Bond<br>TR Index                                    | Represents securities that are SEC-registered, taxable and dollar denominated. The index covers the U.S. investment grade fixed rate bond market with index components for government and corporate securities, mortgage pass-through securities and asset-backed securities. All returns are market value weighted inclusive of accrued interest.   |  |  |  |

| INVESTMENT OPTION<br>CATEGORY            | BENCHMARK                                   | BENCHMARK/INDEX DEFINITION  |  |  |  |

| High Yield Bond                          | Bloomberg U.S. HY 2% Issuer Cap<br>TR Index | The index measures the performance of high yield corporate bonds, with a maximum allocation of 2% to any one issuer.  |  |  |  |
| Bank Loan                                | Credit Suisse Leveraged Loan TR<br>Index    | The index represents tradable, senior-secured, U.Sdollar-denominated non-investment-grade loans.  |  |  |  |
| World Bond                               | Bloomberg Global Aggregate TR<br>Index      | Provides a broad-based measure of global investment grade debt markets; it includes the U.S. Aggregate Index, Pan-European Aggregate Index and Asian-Pacific Aggregate Index. It also contains a wide variety of customized sub-indices.  |  |  |  |
| World Bond-USD Hedged                    | Bloomberg Global Aggregate TR<br>Hdg USD    | Provides a broad-based measure of global investment grade debt markets; it includes the U.S. Aggregate Index, Pan-European Aggregate Index and Asian-Pacific Aggregate Index. It also contains a wide variety of customized sub-indices.  |  |  |  |
| Emerging Markets Bond                    | JPM EMBI Global Diversified TR Index        | The J.P. Morgan Emerging Markets Bond Index Global (EMBI Global) currently covers 27 emerging market countries. Included in the EMBI Global are U.Sdollar-denominated Brady bonds, Eurobonds, traded loans, and local market debt instruments issued by sovereign and quasi-sovereign entities.   |  |  |  |
| Emerging-Markets Local-<br>Currency Bond | JPM GBI-EM Global Diversified TR<br>USD     | The J.P. Morgan Government Bond Index - Emerging Markets Diversified index covers 18 emerging market economies. Included in the GBI EM are fixed rate, investment grade local currency debt securities, regularly traded, liquid fixed rate, domestic currency government bond. GBI EM Global consists of treasury securities from emerging markets and is diversified weighted.              |  |  |  |
| Nontraditional Bond                      | Wilshire Liquid Alternative Index           | Designed to provide a broad measure of the liquid alternative market by combining the performance of the Wilshire Liquid Alternative Equity Hedge Index, Wilshire Liquid Alternative Global Macro Index, Wilshire Liquid Alternative Relative Value Index, Wilshire Liquid Alternative Multi-Strategy Index, and Wilshire Liquid Alternative Event Driven Index.                              |  |  |  |
|  |   | U.S. LARGE CAP EQUITIES   |  |  |  |
| Large Cap Value                          | Russell 1000 Value Index                    | Measures the performance of the large-cap value segment of the U.S. equity universe. It is a market-<br>capitalization weighted index of those firms in the Russell 1,000 with lower price-to-book ratios and lower<br>forecasted growth values.  |  |  |  |
| Large Cap Blend                          | Russell 1000 Index                          | Measures the performance of the large-cap segment of the U.S. equity universe. It is a subset of the Russell 3000 Index and includes approximately 1,000 of the largest securities based on a combination of their market cap and current index membership. The Russell 1000 represents approximately 92% of the U.S. market.   |  |  |  |
| Large Cap Blend                          | Russell 3000 Index                          | Measures the performance of the largest 3,000 U.S. companies representing approximately 98% of the investable U.S. equity market.   |  |  |  |
| Large Cap Blend                          | S&P 500 Index                               | Measures the performance of 500 leading large-capitalization companies in the U.S. and captures approximately 80% of the available U.S. market capitalization. Companies must have a market cap of \$5.3 billion and have positive earnings over the most recent quarter and trailing four quarters. The index does not overlap holdings with the S&P MidCap 400 or S&P 600 SmallCap Indexes. |  |  |  |

| INVESTMENT OPTION<br>CATEGORY | BENCHMARK   | BENCHMARK/INDEX DEFINITION   |
|-------------------------------|---|--|
|                               |   | U.S. LARGE CAP EQUITIES  |
| Large Cap Blend               | CRSP U.S. Total Market Index                          | Comprised of 4,000 constituents from mega, large, small and micro capitalizations, representing nearly 100% of the investable U.S. equity market. CRSP stands for Center for Research in Security Prices and was founded in 1960 to help develop a definitive measurement of long-run market returns.  |
| Large Cap Growth              | Russell 1000 Growth Index                             | Measures the performance of the large-cap growth segment of the U.S. equity universe. It is a market-<br>capitalization weighted index of those firms in the Russell 1000 with higher price-to-book ratios and higher<br>forecasted growth values.   |
|                               |   | U.S. MID CAP EQUITIES  |
| Mid-Cap Value                 | Russell Mid Cap Value Index                           | Measures the performance of the mid-cap value segment of the U.S. equity universe. It includes those Russell Midcap Index companies with lower price-to-book ratios and lower forecasted growth values.  |
| Mid-Cap Blend                 | Russell Midcap Index                                  | Measures the performance of the mid-cap segment of the U.S. equity universe. It is a subset of the Russell 1000 Index and includes approximately 800 of the smallest securities based on a combination of their market cap and current index membership.   |
| Mid-Cap Blend                 | S&P 400 MidCap Index                                  | Measures the performance of 400 mid-sized companies of the U.S. equity market based on their market capitalization. Companies must have an unadjusted market cap of \$1.4 billion to \$5.9 billion and have positive earnings over the most recent quarter and trailing four quarters. The index does not overlap holdings with the S&P 500 or S&P SmallCap 600 Indexes. |
| Mid-Cap Blend                 | MSCI U.S. Mid Cap 450 Index                           | Consists of the next largest 450 companies of the U.S. equity market and measures the performance of the mid cap segment.  |
| Mid Cap Blend                 | CRSP U.S. Mid Cap Index                               | Includes U.S. companies that fall between the top 70% to 85% of investable market capitalization, representing a broad mix of U.S. mid-size companies.   |
| Mid Cap Blend                 | S&P Completion Index                                  | Comprises all members of the S&P Total Market Index except for the current constituents of the S&P 500. The index covers approximately 3000 constituents, offering investors broad exposure to mid, small, and microcap companies.   |
| Mid Cap Blend                 | Dow Jones U.S. Completion Total<br>Stock Market Index | A sub-index of the Dow Jones U.S. Total Stock Market Index that excludes components of the S&P 500. The Dow Jones U.S. Total Stock Market Index is a market-weighted index that includes about 3,650 large, mid, small and micro-cap companies that trade on U.S. stock exchanges.   |
| Mid-Cap Growth                | Russell Midcap Growth Index                           | Measures the performance of the mid-cap growth segment of the U.S. equity universe. It includes those Russell Midcap Index companies with higher price-to-book ratios and higher forecasted growth values.   |

| BENCHMARK                      | BENCHMARK/INDEX DEFINITION   |  |  |  |
|--------------------------------|--|--|--|--|
| U.S. SMALL CAP EQUITIES        |  |  |  |  |
| Russell 2000 Value Index       | Measures the performance of the small-cap value segment of the U.S. equity universe. It is a market-<br>weighted total return index that measures the performance of companies within the Russell 2000 having<br>lower price-to-book ratios and lower forecasted growth values.  |  |  |  |
| Russell 2000 Index             | Measures the performance of the small-cap segment of the U.S. equity universe. The Russell 2000 Index is a subset of the Russell 3000 Index representing approximately 10% of the total market capitalization of that index. It includes approximately 2000 of the smallest securities based on a combination of their market cap and current index membership.        |  |  |  |
| S&P SmallCap 600 Index         | Measures the performance of 600 small-cap companies of the U.S. equity market based on their market capitalization. Companies must have an unadjusted market cap of \$400 million to \$1.8 billion and have positive earnings over the most recent quarter and trailing four quarters. The index does not overlap holdings with the S&P 500 or S&P MidCap 400 Indexes. |  |  |  |
| MSCI U.S. Small Cap 1750 Index | Consists of the smallest 1,750 companies in the U.S. Investable Market 2500 Index of the U.S. equity market. It measures the performances of the small cap segment.  |  |  |  |
| CRSP U.S. Small Cap Index      | Includes U.S. companies that fall between the bottom 2% to 15% of the investable market capitalization.  |  |  |  |
| Russell 2000 Growth Index      | Measures the performance of the small-cap growth segment of the U.S. equity universe. It is a market-<br>weighted total return index that measures the performance of companies within the Russell 2000 having<br>higher price-to-book ratios and higher forecasted growth values.   |  |  |  |
|                                | WORLD STOCK  |  |  |  |
| MSCI ACWI NR                   | A free float-adjusted market capitalization weighted index that is designed to measure the equity market performance of developed and emerging markets. The MSCI ACWI consists of 46 country indexes comprising 23 developed and 23 emerging market country indexes.   |  |  |  |
| MSCI ACWI Growth NR USD        | The index captures large and mid cap securities across 23 Developed Markets (DM) countries and 25 Emerging Markets (EM) countries. There are five variables used: long term forward EPS growth rate, short-term forward EPS growth rate, current internal growth rate and long-term historical EPS growth trend and long-term historical sales per share growth trend. |  |  |  |
| MSCI ACWI Value NR USD         | The index captures large and mid cap securities across 23 Developed Markets (DM) countries and 25 Emerging Markets (EM) countries. Investment style characteristics are defined using three variables: book value to price, 12 month forward earning to price and dividend yield.  |  |  |  |
| MSCI ACWI SMID NR USD          | The index captures mid and small cap across 23 Developed Markets (DM) and 25 Emerging Markets (EM) countries. With 7,858 constituents, the index covers approximately 28% of the free float-adjusted market capitalization in each country.  |  |  |  |

| Target Date                   | S&P Target Date Indexes                                    | Consist of eleven multi-asset class indices, each corresponding to a specific target retirement date. Each target date index is designed to represent a broadly derived consensus of asset class exposure for each target date year, as well as an overall glide path. Each index corresponds to a particular target retirement date, providing varying levels of exposure to equities, bonds and other asset classes. The asset allocation for each index is based on market observations through an annual survey of target date fund managers. Each index is created and retired as determined by the target date fund survey. |  |  |  |

## **Morningstar ESG Definitions**

| TERM  | DEFINITION   |
|---|--|
|   |  |
| Breakdown of ESG Scores – Percent of AUM                                    | Sustainalytics measures the degree to which a company's economic (enterprise) value is at risk driven by ESG factors or the magnitude of a company's unmanaged ESG risks. 67% of assets in the portfolio holdings must be identified to receive a rating. Based on the Unmanaged Risk scores, corporate entities are assigned to one of five ESG risk categories: Negligible, Low, Medium, High and Severe.  |
| Breakdown of ESG Scores – Percent of<br>AUM with Negligible ESG Risk Scores | ESG Risk Score ESG Risk Classification: 0-10 Negligible, 10-20 Low, 20-30 Medium, 30-40 High, 40+ Severe   |
| Breakdown of ESG Scores – Percent of AUM with Low ESG Risk Scores           | ESG Risk Score ESG Risk Classification: 0-10 Negligible, 10-20 Low, 20-30 Medium, 30-40 High, 40+ Severe   |
| Breakdown of ESG Scores – Percent of<br>AUM with Medium Risk Scores         | ESG Risk Score ESG Risk Classification: 0-10 Negligible, 10-20 Low, 20-30 Medium, 30-40 High, 40+ Severe   |
| Breakdown of ESG Scores – Percent of AUM with High ESG Risk Scores          | ESG Risk Score ESG Risk Classification: 0-10 Negligible, 10-20 Low, 20-30 Medium, 30-40 High, 40+ Severe   |
| Breakdown of ESG Scores – Percent of<br>AUM with Severe ESG Risk Scores     | ESG Risk Score ESG Risk Classification: 0-10 Negligible, 10-20 Low, 20-30 Medium, 30-40 High, 40+ Severe   |
| Historical Sustainability Risk in Global Category                           | The Morningstar Historical Portfolio Sustainability Score is a weighted average of the trailing 12 months of Morningstar Portfolio Sustainability Scores. Historical portfolio scores are not equal-weighted; rather, more-recent portfolios are weighted more heavily than more-distant portfolios.   |
| Breakdown of Carbon Risk  | The Morningstar portfolio Carbon Risk Score is the asset-weighted Sustainalytics carbon-risk rating of companies held in a portfolio. It evaluates how much unmanaged carbon risk remains for a company after accounting for its management activities that mitigate overall carbon exposure. The carbon risk rating is based on assessments across two dimensions: exposure and management. Exposure is a measure of degree to which carbon risks are material across the entire value chain, in a firm's supply chain, its own operations, products and services. Management is quality of management approach to reduce emissions and related carbon risk. Company unmanaged risk scores range from low to high (lower is better) starting from zero and are sorted into five risk categories: Severe, High, Medium, Low and Negligible |
| Breakdown of Carbon Risk – Percent of AUM with Severe Carbon Risk           | Risk score of 50+.   |
| Breakdown of Carbon Risk – Percent of<br>AUM with High Carbon Risk          | Risk score of 30-49.9  |
| Breakdown of Carbon Risk – Percent of AUM with Medium Carbon Risk           | Risk score of 10-29.9  |
| Breakdown of Carbon Risk – Percent of AUM with Low Carbon Risk              | Risk score of 0.1-9.99   |
| Breakdown of Carbon Risk – Percent of<br>AUM with Negligible Carbon Risk    | Carbon risk score of 0   |

| TERM  | DEFINITION   |
|---|--|
|   |  |
| Product Involvement %                                       | Sustainalytics presents product involvement at the company level as a range of revenue exposure for all product areas except for Abortive/Contraceptives/Stem Cell, Animal Testing and Controversial Weapons. For these three product areas, company involvement is a binary, either yes or no. For all other product areas, the company revenue exposure ranges are None, 0.1-4.9%, 5-9.9%, 10-24.9%, 25-49.9% and 50-100%. Morningstar established a minimum involvement threshold. For each product area, the holdings that meet the minimum involvement threshold are summed by their weight in the portfolio. The sum represents the portfolio's asset weighted exposure to the product involvement area. |
| Product Involvement % -<br>Abortive/Contraceptive/Stem Cell | The percent of a fund's assets under management that is invested in companies that are classified as directly involved in the manufacturing of drugs that have abortifacient properties or contraceptives, or the use of human embryonic stem cells, fetal cell lines for vaccines or biological development; indirectly by owning acute care hospitals or surgical centers related to abortion or contraceptive procedures or developing technologies that enable human embryonic stem cells, fixed to abortion or contraceptive procedures or developing technologies that enable human embryonic stem cell research. Minimum revenue threshold is binary – yes/no.  |
| Product Involvement % - Adult<br>Entertainment              | The percent of a fund's assets under management that is invested in companies that are classified as directly involved in the production of adult entertainment and/or owns/operates adult entertainment establishments including movies, television, magazines and adult websites; indirectly by distributing adult entertainment materials. The minimum revenue threshold to mark a company as involved is 50%.  |
| Product Involvement % - Alcohol                             | The percent of a fund's assets under management that is invested in companies that are classified as directly involved in the manufacturing of alcoholic beverages; indirectly involved by supplying of alcohol related product/services to alcoholic beverage manufacturers, including specialized equipment or raw materials to produce alcohol. The company derives revenue from distribution and/or retail sale of alcoholic beverages. The minimum revenue thresholds to mark a company as involved are the following ranges: manufacturing: 5-9.9%; Supplier 50-100% and Distribution 25-49.9%   |
| Product Involvement % - Animal Testing                      | The percent of a fund's assets under management that is invested in companies that are classified as directly involved in animal testing for pharmaceutical products, medical devices, biotechnology or non-pharmaceutical products. Minimum revenue threshold is binary – yes/no.   |
| Product Involvement % - Controversial<br>Weapons            | The percent of a fund's assets under management that is invested in companies that are classified as directly involved in the core weapon system that are considered tailor-made and essential for the lethal use of the weapon; indirectly by providing components/services for the core weapon system, which are either not considered tailor-made or not essential to the lethal use of the weapon. Minimum revenue threshold is binary – yes/no  |
| Product Involvement % - Fur & Specialty<br>Leather          | The percent of a fund's assets under management that is invested in companies that are classified as directly involved in manufacturing products made from fur or specialty leather, including products made from animals solely hunted or bred for their skin and fur; indirectly by deriving 10% or more of revenue from the distribution or retail sale of such products. The minimum revenue thresholds to mark a company as involved are the following ranges: Production: 50-100%; Revenues: 25-49.9%.   |
| Product Involvement % - Gambling                            | The percent of a fund's assets under management that is invested in companies that are classified as directly involved by owning or operating gambling establishment(s) such as a casino, racetrack or online gambling; indirectly by providing supporting products/services to gambling operations. Manufacturing specialized equipment used for gambling, including slot machines, roulette wheels, and lottery terminals. The minimum revenue threshold to mark a company as involved is 5-9.9%.  |
| Product Involvement % - GMO                                 | The percent of a fund's assets under management that is invested in companies that are classified as directly involved in growing genetically modified crops; indirectly involved in the development or cultivation of genetically modified seeds or plants. The minimum revenue thresholds to mark a company as involved are the following ranges: Growth: 0.1-4.9%; Development: 5-9.9%.   |

# **Morningstar ESG Definitions**

| TERM  | DEFINITION   |
|---|--|
|   |  |
| Product Involvement % - Military<br>Contracting | The percent of a fund's assets under management that is invested in companies that are classified as directly involved in the manufacturing of military weapon systems, secondary components of weapons or weapon related services; indirectly involved by providing products/services that support military weapons or the company provides non-weapons related to tailor-made products and/or services to the military or defense industry. The minimum revenue thresholds to mark a company as involved are the following ranges: manufacturing and related weapons: 5-9.9%; Non-weapons: 25-49.9%. |
| Product Involvement % - Nuclear                 | The percent of a fund's assets under management that is invested in companies that are classified as directly involved in the production of nuclear power, including utilities that own or operate nuclear power generators; indirectly by providing products/services that support the industry or distributing electricity generated from nuclear power. The minimum revenue thresholds to mark a company as involved are the following ranges: Production: 5-9.9% - Distribution and supporting products and services: 10-24.9%.  |
| Product Involvement % - Palm Oil                | The percent of a fund's assets under management that is invested in companies that are classified as directly involved in the production and/or distribution of palm oil. The minimum revenue threshold to mark a company as involved is the following range: 5-9.9%.  |
| Product Involvement % - Pesticides              | The percent of a fund's assets under management that is invested in companies that are classified as directly involved in the manufacturing of pesticides, including herbicides, fungicides or insecticides; indirectly by deriving 10% or more of revenue from the distribution or retail sale of pesticides. The minimum thresholds to mark a company as directly involved are the following ranges: production: 5-9.9%; Revenues: 50-100%.  |
| Product Involvement % - Small Arms              | The percent of a fund's assets under management that is invested in companies that are classified as directly involved in the manufacturing of small arms; indirectly involved in retail and/or distribution of small arms and/or key components. The minimum revenue thresholds to mark a company as involved are the following ranges: manufacturing: 0.1-4.9%; Retail: 5-9.9%.  |
| Product Involvement % - Thermal Coal            | The percent of a fund's assets under management that is invested in companies that are classified as directly involved in the extraction of thermal coal for coal mining and exploration; indirectly by generating electricity from thermal coal, including utilities that own or operate coal-fired power plants. The minimum revenue threshold to mark a company as involved is the following range: 0.1-4.9%  |
| Product Involvement % - Tobacco                 | The percent of a fund's assets under management that is invested in companies that are classified as directly involved in the manufacturing of tobacco products; indirectly involved by supplying tobacco-related products or deriving 10% or more of revenue from the distribution/retail sales of tobacco products. The minimum revenue threshold to mark a company as involved are the following ranges: manufacturing: 0.1-4.9%; Related & Revenues: 10-24.9%.   |

Distributions from traditional IRAs and employer sponsored retirement plans are taxed as ordinary income and, if taken prior to reaching age 59½, may be subject to an additional 10% IRS tax penalty. A Roth retirement account offers tax free withdrawals on taxable contributions. To qualify for the tax-free and penalty-free withdrawal of earnings, a Roth account must be in place for at least five tax years, and the distribution must take place after age 59½, or due to death or disability. Depending on state law, Roth accounts distributions may be subject to state taxes

# **Retirement Committee Meeting**

Presented August 20, 2024

- 1) Attendance and confirm quorum Jennifer Montero
- 2) Introduction of Denise Bass and review Delegation of Authority Amy Rojas and Tim Horkan
- 3) Review Q1 May 14, 2024 meeting minutes Jennifer Montero /Committee
- 4) Q2 Plan Administrator Update Aaron Schluep, Empower
- 5) Investment Fund/Market Review Lisa Drake, Sageview
- 6) Review SECURE 1.0 & 2.0 Provisions for plan considerations and vote Lisa Drake and James Taylor
- 7) Consider amendments to plan documents Amy Rojas and James Taylor
- 8) Review Sageview Collective Investment Trust (CIT) James Taylor
- 9) Consider renewal of Sageview contract with the 1 year extension James Taylor
- 10) Consider new Committee Chair Amy Rojas
- 11) Public comments

(See following slides for details)

| Provision         | Description                                      | Effective | Details   |
|-------------------|--|-----------|---|
| Secure 2.0<br>326 | No penalty for terminal illness<br>distributions | Sept 2024 | <ul> <li>Provides that distributions made to employees after they have been certified to be terminally ill are exempt from the 10% early withdrawal penalty.</li> <li>Changes the applicable definition of "terminally ill individual" under IRC 101(g)(4)(A) to expected death in 84 months (increased from 24 months).</li> <li>Such amounts can be repaid with 3-years.</li> <li>Only applicable for the 401(a)</li> </ul> |

## Staff and advisor recommendation:

• Adopt Provision 326 to allow no penalty for terminal illness distributions to the 401(a) plan

#### Vote – Secure 2.0:

1. Adopt Provision 326

| Provision         | Description  | Effective | Details  |
|-------------------|--|-----------|--|
| Secure 2.0<br>109 | Higher catch-up limit for<br>individuals age 60-63 | Jan 2025  | <ul> <li>Increases catch-up limit for participants age 60–63:</li> <li>To the greater of (1) \$10,000 and (2) 150% of the regular limit.</li> <li>The increased amounts are indexed for inflation for tax years beginning after December 31, 2025.</li> <li>Has administrative/payroll complications around Roth catch-up contributions</li> </ul> |

## Staff and advisor recommendation:

• Adopt Provision 109 to allow higher catch-up limits

## Vote – Secure 2.0:

1. Adopt Provision 109

# 7. Plan Design & Alignment

**Objective:** Consider administrative amendments to plan documents, which may require BOG approval

- 1. Current plan documents are not consistently written and call for different treatments with respect to the plan elements related to:
  - Eligibility,
  - Distributions, and
  - Loans
- 2. Align the plan documents with consistent wording to avoid operational risk and improve the quality of participants' experience
- 3. Request that the Committee consider revisions of plan documents to address inconsistencies and ensure plan design meets the current need

#### **Eligibility**

- Non-resident aliens
  - Plan documents define Non-Resident Aliens as non-U.S. Citizens who are employed by Citizens and who perform their services outside of the U.S.
  - We currently have no such employees, and therefore, this is currently not a concern.
  - If we hire these individuals, the Plans do allow such employee to defer compensation under the 457(b) plan but
    not to receive a match under the 401(a) plan. This creates administrative complexity and raises the probability of
    error, particularly the risk that a company match would be made inadvertently (checking immigration status is not
    an element of the bi-weekly payroll/retirement plan procedures).

#### **Recommendation:**

#### **Option A**

- Amend the 401(a) plan to allow the 8% company match in such cases.
- The financial impact, if such a case arose, would be approximately avg \$8,000 per employee.

#### **Option B**

- Amend the 457(b) plan to prevent deferral into the plan.
- No amendment to the 401(a) would be required as there would be \$0 in deferral.
- The financial impact would be \$0.

#### **Retirement Plan Committee Requested Action:**

Staff supports either option, but requests the Committee vote its preferred option

## <u>Loans</u>

## Situation:

- Participant loans from 401(a) & 401(k) must be repaid upon termination, but the terms of loans from 457(b) are unaffected by termination and can be repaid over time. Plan participants may have loans from one, two, or all three plans.
- Inconsistent handling of loan repayments upon employee termination creates administrative challenges and unintended burdens for recently former employees, including potential IRS penalties and taxes.

## **Recommendation:**

- HR and SageView recommends allowing former employees to continue loan repayment schedule (Option A)
- No financial impact to Citizens
- Amend plan documentation to either:
  - Option A: allow the continuation of loan repayment irrespective of the plan type, or
  - Option B: require immediate full loan repayment, irrespective of the plan type

## **Retirement Plan Committee Requested Action:**

Request the Committee vote its preferred option

# 7. Plan Design & Alignment (Distributions)

## **Distributions**

**In-Service Withdrawals:** The retirement age is not consistent across the plans and money types (mainly affecting the participants' ability to access their funds in older merged accounts until age 65)

• No financial impact to Citizens

### **Recommendation:**

- HR and Plan advisors recommend allowing using age 59.5 across all plans and money types
- Amend the retirement age to 59.5 for all plans

### **Retirement Plan Committee Requested Action:**

• Request the Committee vote its preferred option

#### **Distributions**

#### Mandatory Transfers to IRA:

- Inconsistent handling of employee balances upon termination, including different treatment based upon balance amount and whether/how forced-outs may occur (401(a) & 401(k) follow Option A while 457(b) follows Option B)
- Inconsistent handling creates administrative challenges and unintended burdens for former employees.
- HR and SageView recommend Option A (common industry practice), while external Counsel prefers Option B.

#### **Recommendation:**

#### **Option A**

- Amend the 457(b) plan to mirror the other two plans.
- Employee balances under \$1K are immediately distributed (cashed out without consent)
- Employee balances between \$1K -\$5K are automatically rolled over (without consent) into an IRA with Millenium Trust Co., which would <u>save</u> \$25pp/pa (likely deminimus).
- Employee balances greater than \$5k <u>may</u> remain in the Plan until employee initiates a Distribution

#### **Retirement Plan Committee Requested Action:**

• Request the Committee vote its preferred option

**Option B** 

- Amend the 401(a) & 401(k) plans to mirror the 457(b).
- Employee balances under \$1K are immediately distributed (cashed out without consent)
- Employee balances greater than \$1k <u>may</u> remain in the Plan until employee initiates a Distribution
- The financial impact would be an additional \$25pp/pa. Likely deminimus.

#### Option C

- · Amend all plans to 'no force-out"
- Employee full balance will remain in the Plan until employee initiates a Distribution
- The financial impact would be an additional \$25pp/pa.

It should be emphasized that Options B & C increase the number of participants who remain in Citizens accounts and creates fiduciary responsibility for more small accounts.

# 7. Plan Design & Alignment (Contributions)

### **Contributions**

## Consider treatment of Unused Leave Payout to be deferred upon termination

Three options:

- A. Excluded deferrals (current process) no action needed
- B. Deferrable in 457(b) & matchable in the 401(a) would require BOG approval
- C. Deferrable 457(b) but not matchable in the 401(a) Committee's sole discretion

### **Recommendation:**

• Option C: Allow deferral into the 457(b) plan but not match in the 401(a) plan, as this has \$0 cost to Citizens

## **Retirement Plan Committee Requested Action:**

Request the Committee vote its preferred option

# 8. Sageview Collective Investment Trust

#### **Background:**

At the last meeting, SageView highlighted its Collective Investment Trust (CIT), which offers lower cost options for American funds.

- Currently, American Funds performs well and has belowaverage fees for "actively managed" target date funds, but the fees are higher than those offered by passive target date funds (such as Vanguard).
- With the CIT, the fees to participants would go down approximately 28 basis points for each of the target dates.
- At current levels, this would save participants approximately \$60,000 in net fees annually. As Sageview brings more client assets into the CIT, the discounts to Citizens participants will increase.
- Sageview would charge a 2 basis points fee and a contract amendment would be required

#### **Recommendation:**

CIT offers some benefit to participants, in aggregate, but cost savings may be less significant on a per participant basis.

Interlinking Plan cost savings arrangements with the Plan's Advisory firm requires further analysis and consideration.

Staff recommends the Committee pause its decision on this topic until a more thoughtful analysis can occur; an ideal time might be at the point that a formal procurement is undertaken.

#### **Retirement Plan Committee Requested Action:**

Staff requests the Committee vote its preference or, alternatively, to not take vote at this time.

## **Background**

Sageview contract: **July 1, 2020 – June 30, 2025**, with <u>two 1-year</u> renewals Sageview has been a trusted financial advisor and valued partner during their tenure

### **Recommendation:**

- Option A: Proceed with the first 1-year renewal for July 1, 2025 June 30, 2026 (no change in contract pricing)
- Option B: Conduct a procurement immediately for a new long-term contract starting in July 2025

### **Retirement Plan Committee Requested Action:**

• Request the Committee vote its preferred option
